**Supplement to the Fund’s  
Summary Prospectus for JULZ dated June 29, 2020,  
Summary Prospectus for AUGZ dated July 1, 2020, and  
Prospectus and Statement of Additional Information dated June 29, 2020**

*The following replaces the seventh and eighth paragraphs including the hypothetical returns charts in the “Principal Investment Strategy” section for each Fund in the Prospectus.*

The following charts illustrate the hypothetical returns that the Fund seeks to provide in certain illustrative scenarios for a shareholder that purchases Fund shares on the Initial Investment Day and holds such shares for the entire Investment Period. These charts do not take into account payment by the Fund of fees and expenses and assume a buffer of 10%. **There is no guarantee that the Fund will be successful in providing these investment outcomes for any Investment Period.**

The Fund includes a mix of purchased and written (sold) put and call options structured to achieve the results described above. The Fund is designed to seek to achieve the results described above for investments made on the Initial Investment Day and held until the last day of the Investment Period. **Investments made on any day other than the Initial Investment Day may differ significantly, positively or negatively, from the results described above.** The Fund’s website, [www.true-shares.com](http://www.true-shares.com), contains information about the Fund’s holdings, and the level of the S&P 500 Price Index as of the Initial Investment Day and the prior business day to assist an investor in understanding and the range of results such investor can expect for investments made at times other than on the Initial Investment Day.

*The following paragraph supplements the “Purchase and Redemption of Shares in Creation Units – Procedures for Purchase of Creation Units” on page 21 of the Statement of Additional Information. Information to the contrary with respect to the Fund should be disregarded.*

All orders to purchase Shares directly from the Funds must be placed for one or more Creation Units and in the manner and by the time set forth in the Participant Agreement and/or applicable order form. With respect to each Fund, the order cut-off time for orders to purchase Creation Units is 3:00 p.m. Eastern time, which time may be modified by a Fund from time-to-time by amendment to the Participant Agreement and/or applicable order form. In the case of custom orders, the order must be received by the Distributor no later than 3:00 p.m. Eastern time for the Funds, or such earlier time as may be designated by the applicable Fund and disclosed to Authorized Participants. The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the “Order Placement Date.”

*The following paragraph supplements the “Purchase and Redemption of Shares in Creation Units – Procedures for Redemption of Creation Units” on page 24 of the Statement of Additional Information. Information to the contrary with respect to the Fund should be disregarded.*

**Procedures for Redemption of Creation Units.** Orders to redeem Creation Units must be submitted in proper form to the Transfer Agent prior to 3:00 p.m. Eastern time. A redemption request is considered to be in “proper form” if (i) an Authorized Participant has transferred or caused to be transferred to the Trust’s Transfer Agent the Creation Unit(s) being redeemed through the book-entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor’s shares through DTC’s facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request shall be rejected.

# TrueShares Structured Outcome (July) ETF (JULZ)

## Listed on Cboe BZX Exchange, Inc.

### Summary Prospectus dated June 29, 2020

Before you invest, you may want to review the Fund's prospectus and statement of additional information ("SAI"), which contain more information about the Fund and its risks. The current prospectus and SAI dated June 29, 2020, are incorporated by reference into this Summary Prospectus. You can find the Fund's prospectus, reports to shareholders, and other information about the Fund online at <https://www.true-shares.com/julz>. You can also get this information at no cost by calling 1-800-617-0004 or by sending an e-mail request to [ETF@usbank.com](mailto:ETF@usbank.com).

**IMPORTANT NOTE:** Beginning on January 1, 2021, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the shareholder reports from your financial intermediary, such as a broker-dealer or bank. Instead, the shareholder reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future Fund shareholder reports in paper, free of charge. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

---

#### Investment Objective

The TrueShares Structured Outcome (July) ETF (the "Fund") seeks to provide investors with returns (before fees and expenses) that track those of the S&P 500 Price Return Index (the "S&P 500 Price Index") while seeking to provide a buffer against the first 8% to 12% of S&P 500 Price Index losses, over the period from July 1, 2020 to June 30, 2021.

#### Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold or sell shares of the Fund ("Shares"). This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Shares.

---

<b>Shareholder Fees</b> ( <i>fees paid directly from your investment</i> )	None
<b>Annual Fund Operating Expenses</b> ( <i>expenses that you pay each year as a percentage of the value of your investment</i> )	
Management Fees	0.79%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses*	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.79%</b>

---

---

\* Estimated for the current fiscal year.

#### Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

**1 Year: \$81**

**3 Years: \$252**

#### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable

account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Example, affect the Fund's performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

### Principal Investment Strategy

The Fund is an actively-managed exchange-traded fund ("ETF") that seeks to achieve its investment objective by investing substantially all of its assets in options that reference the S&P 500 Price Index. The Fund's investment adviser, TrueMark Investments, LLC ("TrueMark"), and sub-adviser, SpiderRock Advisors, LLC ("SpiderRock"), will employ a "buffer protect" options strategy that uses such options to seek to achieve exposure to the S&P 500 Price Index while mitigating the first 8% to 12% decline in the S&P 500 Price Index (the "Buffer") over a 12-month period beginning on a specified day each July (each, a "Roll Date"). The period from one Roll Date to the next Roll Date is referred to as the "Investment Period," and the first day of the Investment Period is referred to as the "Initial Investment Day").

The Fund will purchase call options and sell (write) put options on the S&P 500 Price Index or an ETF that tracks the S&P 500 Price Index on each Initial Investment Day with an expiration on the next Roll Date. An option gives the purchaser of the option the right to purchase (for a call option) or sell (for a put option) the underlying asset (or deliver cash equal to the value of an underlying index) at a specified price ("strike price"). In the event the underlying asset declines in value, the value of a put option will generally increase (and the value of a call option will generally decrease and may end up worthless), and in the event the underlying asset appreciates in value, the value of a put option will generally decrease and may end up worthless (and the value of a call option will generally increase).

On each Initial Investment Day, the Fund will sell (write) put options on the S&P 500 Price Index or an ETF that tracks the S&P 500 Price Index with a strike price within a range of approximately 8% to 12% lower than the current value of the S&P 500 Price Index or an ETF that tracks the S&P 500 Price Index. As the seller of these options, the Fund receives a premium from the buyer of the options, which the Fund invests in at-the-money call options on the S&P 500 Price Index or an ETF that tracks the S&P 500 Price Index (*i.e.*, call options having a strike price roughly equal to the current value of the S&P 500 Price Index or an ETF that tracks the S&P 500 Price Index). The relative price of the put options sold (written) by the Fund to the price of the call options purchased by the Fund will determine the Fund's exposure to the S&P 500 Price Index during the Investment Period. **Due to the cost of the options used by the Fund, the correlation of the Fund's performance to that of the S&P 500 Price Index is expected to be less than if the Fund invested directly in the S&P 500 Price Index without using options, and could be substantially less.** This means that if the S&P 500 Price Index experiences gains for an Investment Period, the Fund may not realize gains to the same extent.

The Fund's strategy is to seek to protect investors from a decline of up to 8% to 12% in the performance of the S&P 500 Price Index from one Roll Date to the next Roll Date. When the Adviser or Sub-Adviser sells puts on the S&P 500 Price Index to create the buffer range, the proceeds are used to purchase calls at the money. However, not all puts generate the same premium relative to the downside exposure of the Fund. The Adviser will seek to deliver a buffer of 10% from the reference price of the S&P 500 Price Index on the first trading day of the month. However, the market could fluctuate on or after the buffer is set and this range allows for market condition volatility. **The Fund is not designed to protect against declines of more than 8% to 12% in the level of the S&P 500 Price Index, and there can be no guarantee that the Fund will be successful in implementing the buffer protect options strategy to avoid the first 8% to 12% decline.** Additionally, even if the Fund mitigates a decline in the performance of the S&P 500 Price Index from one Roll Date to the next Roll Date, the Fund's returns during the Investment Period (prior to the next Roll Date) may not reflect the buffer protect options strategy.

The Fund will invest in standardized exchange-listed options or in exchange-traded FLEXible EXchange Options ("FLEX Options"), which are customized exchange-traded option contracts available through the Chicago Board Option Exchange ("Cboe") that are guaranteed for settlement by The Options Clearing Corporation ("OCC"). FLEX Options provide investors with the ability to customize exercise prices, exercise styles, and expiration dates, while achieving price discovery in competitive, transparent, auction markets and avoiding the counterparty exposure of over-the-counter ("OTC") options positions. All FLEX Options in the Fund are European-style options (*i.e.*, they can only be exercised at the expiration date of the option) based on the S&P 500 Price Index or an ETF that tracks the S&P 500 Price Index and have an expiration date that is the last day of the Investment Period. In general, the Fund intends to invest in FLEX options only, as these options provide the best combination of OCC guarantees, price discovery, customization, and European-style settlement that is ideal for the Fund. However in certain unforeseen circumstances, listed options may be used by the Fund to provide an additional source of desired market exposure. The Fund also expects to invest in U.S. Treasury bonds.

The Fund is designed to provide the following outcomes during each individual Investment Period:

Change in the Returns of the S&P 500 Price Index	Expected Change in the Returns of the Fund
Declines between -8% and -12% (or more)	Declines 8% to 12% percentage points less than the S&P 500 Price Index (e.g., if the S&P 500 Price Index returns -35%, the Fund is designed to return -23% to -27%)
Declines between 0% and -8%	No change
Appreciates	The Fund's returns will appreciate to a similar extent as the S&P 500 Price Index, but will be less than those of the S&P 500 Price Index due to the cost of the options used by the Fund

The following charts illustrate the hypothetical returns that the Fund seeks to provide in certain illustrative scenarios for a shareholder that purchases Fund shares on the Initial Investment Day and holds such shares for the entire Investment Period. These charts do not take into account payment by the Fund of fees and expenses and assume a buffer of 10%. **There is no guarantee that the Fund will be successful in providing these investment outcomes for any Investment Period.**

The Fund includes a mix of purchased and written (sold) put and call options structured to achieve the results described above. The Fund is designed to seek to achieve the results described above for investments made on the Initial Investment Day and held until the last day of the Investment Period. **Investments made on any day other than the Initial Investment Day may differ significantly, positively or negatively, from the results described above.** The Fund’s website, [www.true-shares.com](http://www.true-shares.com), contains information about the Fund’s holdings, and the level of the S&P 500 Price Index as of the Initial Investment Day and the prior business day to assist an investor in understanding and the range of results such investor can expect for investments made at times other than on the Initial Investment Day. Additionally, the Fund’s website provides information relating to the returns of the Fund, including the Fund’s Buffer and its position relative to the S&P 500 Price Index on a daily basis.

The Fund’s operations are intended to be continuous. It will not terminate and distribute its assets at the conclusion of each Investment Period. On each Roll Date, another Investment Period will commence and the Fund will invest in a new set of options.

The Fund is classified as “non-diversified” under the Investment Company Act of 1940, as amended (the “1940 Act”).

### Principal Investment Risks

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objectives.

- **Buffered Strategy Investment Risk.**

- *Buffered Loss Risk.* There can be no guarantee that the Fund will be successful in its strategy to provide buffer protection against S&P 500 Price Index losses if the S&P 500 Price Index decreases over the Investment Period by 8% or less. A shareholder may lose their entire investment. The Fund’s strategy seeks to deliver returns that match the S&P 500 Price Index (but will be less than the S&P 500 Price Index due to the cost of the options used by the Fund), while limiting downside losses, if Shares are bought on the day on which the Fund enters into the options and held until those options expire at the end of each Investment Period. In the event an investor purchases Shares after the date on which the options were entered into or sells Shares prior to the expiration of the options, the buffer that the Fund seeks to provide may not be available. The Fund does not provide principal protection and an investor may experience significant losses on its investment, including the loss of its entire investment.
- *FLEX Options Risk.* The Fund may invest in FLEX Options issued and guaranteed for settlement by the OCC. The Fund bears the risk that the OCC will be unable or unwilling to perform its obligations under the FLEX Options contracts. Additionally, FLEX Options may be illiquid, and in such cases, the Fund may have difficulty closing out certain FLEX Options positions at desired times and prices.

- ***Options Risk.*** The Fund invests in options that derive their performance from the performance of the S&P 500 Price Index. Writing and buying options are speculative activities and entail investment exposures that are greater than their cost would suggest, meaning that a small investment in an option could have a substantial impact on the performance of the Fund. The Fund's use of call and put options can lead to losses because of adverse movements in the price or value of the underlying stock, index, or other asset, which may be magnified by certain features of the options. These risks are heightened when the Fund's portfolio managers use options to enhance the Fund's return or as a substitute for a position or security. When selling a call or put option, the Fund will receive a premium; however, this premium may not be enough to offset a loss incurred by the Fund if the price of the underlying asset is above or below, respectively, the strike price by an amount equal to or greater than the premium. The value of an option may be adversely affected if the market for the option becomes less liquid or smaller, and will be affected by changes in the value or yield of the option's underlying asset, an increase in interest rates, a change in the actual or perceived volatility of the stock market or the underlying asset and the remaining time to expiration. Additionally, the value of an option does not increase or decrease at the same rate as the underlying asset(s). The Fund's use of options, due to the cost of the options, will reduce the Fund's ability to get returns equal to the S&P 500 Price Index. This means that if the S&P 500 Price Index experiences gains for an Investment Period, the Fund will not benefit to the same extent from those gains. In addition, if the price of the underlying asset of an option is above the strike price of a written call option or below the strike price for a written put option, the value of the option, and consequently of the Fund, may decline significantly more than if the Fund invested directly in the underlying asset instead of using options. The Fund invests in options that derive their performance from the performance of the S&P 500 Price Index and can be volatile and involve various types and degrees of risks. The Fund could experience a loss if its options do not perform as anticipated, or are not correlated with the performance of their underlying stock or if the Fund is unable to purchase or liquidate a position because of an illiquid secondary market.
- ***Purchase and Sale Timing Risk.*** The Fund is designed to protect against the first 8% to 12% decline in the value of the S&P 500 Price Index and provide for participation in any gains, although not to the same extent, as the value of the S&P 500 Price Index, for a 12-month period from one Roll Date to the next Roll Date. Because the options purchased and written by the Fund will expire on the next Roll Date, if you purchase or sell Shares on a date other than a Roll Date or if you hold Shares for more or less than the time from the most recent Roll Date to the next Roll Date, the value of your investment in Shares may not be protected against the first 8% to 12% decline in the value of the S&P 500 Price Index and may not participate in a gain in the value of the S&P 500 Price Index for your investment period. The value of the options purchased and written by the Fund is dependent on, among other factors, the value, implied volatility, and implied dividend rate of the S&P 500 Price Index and interest rates, any or all of which may vary, sometimes significantly, during the period from the most recent Roll Date to the next Roll Date. Consequently, the value of the Fund may not directly track changes in the value of the S&P 500 Price Index in between Roll Dates.
- **Equity Market Risk.** The Fund invests in options that derive their performance from the S&P 500 Price Index, which is made up of common stocks. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises.
- **ETF Risks.** The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:
  - ***Authorized Participants ("APs"), Market Makers, and Liquidity Providers Concentration Risk.*** The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
  - ***Costs of Buying or Selling Shares.*** Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
  - ***Shares May Trade at Prices Other Than NAV.*** As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.

- **Trading.** Although Shares are listed for trading on the Cboe BZX Exchange, Inc. (the “Exchange”) and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Management Risk.** The Fund is actively-managed and may not meet its investment objective based on the investment adviser’s and sub-adviser’s success or failure to implement investment strategies for the Fund.
- **New Fund Risk.** The Fund is a recently organized, non-diversified management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Non-Diversification Risk.** Although the Fund may invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund’s performance. However, the Fund intends to satisfy the asset diversification requirements for qualifying as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”).
- **Portfolio Turnover Risk.** Because the Fund may “turn over” some or all of its options as frequently as monthly, the Fund may incur high levels of transaction costs from commissions or mark-ups in the bid/offer spread. Higher portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund’s performance to be less than you expect. While the turnover of the call options is not deemed “portfolio turnover” for accounting purposes, the economic impact to the Fund is similar to what could occur if the Fund experienced high portfolio turnover (*e.g.*, in excess of 100% per year).
- **Tax Efficiency Risk.** A significant portion of income received from the Fund may be subject to tax at effective tax rates that are higher than the rates that would apply if the Fund were to engage in a different investment strategy. Additionally, the Fund’s investment strategy may require it to effect redemptions, in whole or in part, for cash. As a result, the Fund may be required to sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used exclusively. In addition, cash redemptions may incur higher brokerage costs than in-kind redemptions and these added costs may be borne by the Fund and negatively impact Fund performance. You should consult your tax advisor as to the tax consequences of purchasing, owning, and selling Shares.
- **U.S. Treasury Obligations Risk.** U.S. Treasury obligations may differ from other fixed income securities in their interest rates, maturities, times of issuance and other characteristics. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund’s U.S. Treasury obligations to decline.

## Performance

The Fund is new and therefore does not have a performance history for a full calendar year. In the future, performance information for the Fund will be presented in this section. Updated performance information is available on the Fund’s website at [www.true-shares.com](http://www.true-shares.com) or by calling the Fund toll free at 1-800-617-0004.

## Management

### *Investment Adviser*

TrueMark Investments, LLC serves as investment adviser to the Fund.

### *Sub-Adviser*

SpiderRock Advisors, LLC serves as investment sub-adviser to the Fund

### *Portfolio Managers*

Jordan C. Waldrep, CFA, Chief Investment Officer for the Adviser, Eric Metz, Chief Investment Officer for the Sub-Adviser and Fred Sloneker, Portfolio Manager for the Sub-Adviser, have been portfolio managers of the Fund since its inception in 2020.

**Purchase and Sale of Shares**

Shares are listed on the Exchange, and most investors will buy and sell Shares through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount). The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. Creation Units of the Fund generally consist of at least 25,000 Shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the “Deposit Securities”) and/or a designated amount of cash.

**Tax Information**

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

**Financial Intermediary Compensation**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
